TSRA Clinical Scenarios In Cardiothoracic Surgery

Synopsis

The review of clinical scenarios in cardiothoracic surgery was edited by the Thoracic Surgery Residents Association (TSRA) and authored by more than 50 thoracic surgery residents from programs around the country with over 70 chapters. To ensure the highest level of accuracy and clinical relevance, each chapter was meticulously reviewed by an established faculty member, a section editor, and two main editors. The book includes topics on General Thoracic Surgery, Adult Cardiac Surgery, and Congenital Cardiac Surgery. The TSRA is an organization that represents all thoracic surgery residents in the United States.

Customer Reviews

An exceptional text for Cardiothoracic trainees, no question... and deserves 5 stars for content... but.....Sadly this kindle version doesn't link the 'Table of Contents' to the text on an iPad (and presumably on a Kindle Reader). This means you are forced to look up the page number of your desired chapter & then enter it in the 'go to page' tab to find what you want. Hardly exhausting but inconvenient nevertheless.If you own an iPad you are better to purchase this through the apple store where navigation is easier. A great text let down by a simple failing.

I recommend it to all residents. Very well organised and very clear in what concerns the various subjects treated. Congratulations to the authors

Absolutely fantastic.A valuable asset for board examination candidate.

Very good review booklet for residents and fellows

Very good book
