Screening Sandy Hook: Causes And Consequences

Synopsis

Most parents would never consider dispensing deadly addictive "street" drugs to their children but if a trusted physician writes a prescription for an FDA-approved schedule 2 "medication" for their two-year old based on some questionable mental health screening, those unwary parents do not question or object. Despite side effect warnings, regularly revealed during TV ads, parents frequently fail to take those warnings seriously, perhaps presuming that the side effects are happenstance or rarely occur. Over the decades, because organized psychiatry, represented by the American Psychiatric Association (APA), convened numerous consensus panels that designed hundreds of non-biologically-based "disorders" for its Diagnostic and Statistical Manual of Mental Disorders (DSM) especially suitable for the pill-for-every-ill pharmaceutical industry that conceivably already had many profitable solutions for the "disorders," in the pre-production process. The consequences have been disastrous with no discernable end in sight - some people taking prescription drugs or withdrawing from them have perpetrated school, mall and public shootings. That is in addition to thousands of suicides that the public never hears about, unless the victim is a well-known public figure like Robin Williams. Just the military-related suicide rate is 8,000 per year -untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the VA. The government is big pharma's largest customer. In addition to the homicides and suicides, irreversible brain damage results from drug remedies to temporary problems that might have been easily resolved through compassionate interaction and talk therapy. Despite the claims that drugs were not a factor in the Sandy Hook mass murders, certain circumstances provide a different picture. Adam Lanza, always a unique individual, changed from being a "geeky, weird kid" to being a mass murderer, not of people his own age, but of beautiful, vulnerable children feeling secure in their classrooms in a sleepy bedroom community in Connecticut.

Customer Reviews

Screening Sandy Hook is an exhaustive work by Deanna Spingola which details how an out-of-control pharmaceutical industry contributed to the murder of 20 school children and 6 adults at Sandy Hook Elementary School. This book deserves your attention. "Most parents would never consider dispensing deadly addictive "street" drugs to their children but if a trusted physician writes a prescription for an FDA-approved schedule 2 "medication" for their two-year old based on some questionable mental health screening, those unwary parents do not question or object. Despite side effect warnings, regularly revealed during TV ads, parents frequently fail to take those warnings seriously, perhaps presuming that the side effects are happenstance or rarely occur. Over the decades, because organized psychiatry, represented by the American Psychiatric Association (APA), convened numerous consensus panels that designed hundreds of non-biologically-based "disorders" for its Diagnostic and Statistical Manual of Mental Disorders (DSM) especially suitable for the pill-for-every-ill pharmaceutical industry that conceivably already had many profitable solutions for the "disorders," in the pre-production process. The consequences have been disastrous with no discernable end in sight - some people taking prescription drugs or withdrawing from them have perpetrated school, mall and public shootings. That is in addition to thousands of suicides that the public never hears about, unless the victim is a well-known public figure like Robin Williams. Just the military-related suicide rate is 8,000 per year -untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the VA. The government is big pharma's largest customer.

The title of this book "Screening Sandy Hook - Causes and Consequences" doesn't do justice to the broad scope contained within. For those who are skeptical, or even just curious about the events of December 14, 2012, your questions are answered and then some, as Ms. Spingola leaves no stone unturned in her pursuit of the truth. The book is divided into 5 parts: Part 1 - Vaccines: The Primary Assault Part 2 - The FDA: Protecting the Corporations Part 3 - The Psych Drugs, a Secondary Assault Part 4 - Predictable Violence and its Aftermath Part 5 - Operation Damage Control In part one Deanna covers the history of vaccination in this country, the rise of vaccine-related disease and injuries, and damage control for the pharmaceutical industry, otherwise

known as the Simpsonwood Conference. â œSimpsonwood, Opinions Trump Scienceâ • is a revealing glimpse into the world of the CDC, and how they use the tactics of consensus opinion rather than scientific studies to form policy. Part 2 is an excellent expose on the FDA, which is supposed to protect the public from dangerous food and drugs, and falls extremely short of those goals, with disease and death the inevitable consequence. In Part 3, Deanna explores the psychiatric industry, and discusses how the DSM â “ Diagnostics and Statistics Manual â “ the psychiatric guide, creates names for mental illness based on consensus, and not science. The ill-advised, dangerous practice of the psychiatric drugging of children is also covered in this section. Part 4 is partly a study of Adam Lanza, a â œticking time bombâ •, and his descent into madness. Also covered in this part: psychiatric screening, and the policy of never letting a serious crisis go to waste.
